

Kidney Transplant Smorgasbord

Paul C. Grimm, MD

Professor of Pediatrics

Medical Director, Pediatric Kidney Transplant Program

Stanford University School of Medicine and Stanford Children's Health

This presentation will be a collection of bits and pieces of information for people at different time points in their kidney transplant journey. Some of these will include:

- What to expect from the perspective of the in hospital stay, the early post-transplant issues and long-term issues.
- We will review long term "adulting" with a kidney transplant
- Fertility issues.
- Finally, we will update on the research and what's new and what's hot in transplantation. Are you ready to sign up for a pig kidney? Do you HAVE to take those medications for the rest of your life?
